Education

Ph.D. in Policy Analysis, Pardee RAND Graduate School Expected 2025
Dissertation: "Labor Market Prospects of Online Postsecondary Education"
Committee: Lindsay Daugherty (chair), Christine Mulhern, Patrick Button
Independent study: Methods to Detect Labor Market Discrimination
M.Phil. in Policy Analysis, Pardee RAND Graduate School 2022
M.P.A., The Ohio State University 2018
MA in Economics, University of Virginia 2017
BS in Economics, minor in Mathematics, Le Moyne College 2016

Research Fields

Applied microeconomics, Labor economics, Economics of education

Professional Experience

Assistant Policy Researcher, RAND Corporation, Santa Monica, CA 2020-present

- Applies statistical methods to large datasets to evaluate education programs and technology, assess workforce health across industries, and estimate wage returns to various credentials
- Conducts end-to-end qualitative research, including drafting protocols, leading data collection activities, and analyzing transcript data to identify themes
- Designs, administers, and analyzes longitudinal surveys
- Provides technical assistance to other research teams using linked postsecondary education and employment datasets
- Writes peer-reviewed reports that are accessible to non-technical readers, including two first-authored reports about [Florida K-12 mathematics teachers' preparation](#) and [use of data](#) using survey data from RAND's American Educator Panels

Fellow, Department of Labor Chief Evaluation Office, Washington, D.C. Summer 2024

- Estimated panel data models of the wage returns for online community college credentials and presented findings to ~100 department-wide leaders and staff

Development Associate, Noble Network of Charter Schools, Chicago, IL 2018-2020

- Fundraised an annual budgetary need of \$6 million in a three-person development team through grant proposals and a donor portfolio of foundations, corporations, government agencies, and individuals

Invited Talks & Conferences

In 2024:

Ohio Longitudinal Data Archive’s October Data Stewards Meeting, “*The Labor Market Returns for Online Community College Students*” (presentation)

Department of Labor Chief Evaluation Office’s Summer Fellows Day, “*The Labor Market Returns for Online Community College Students*” (presentation)

In 2023:

APPAM Conference, “*The Labor Market Prospects of Adult Learners with Online Bachelor's Degrees: A Correspondence Audit Field Experiment*” (poster)

Teaching Experience

At Pardee RAND Graduate School:

Statistics for Policy Analysis, Teaching Assistant (2022)

Mathematics for Policy Analysis, Teaching Assistant (2021)

First-year Ph.D. Bootcamp, Microeconomics Lecturer (2021)

At Le Moyne College:

Upward Bound, Middle and high school mathematics tutor (2016, 2017)

Introductory Microeconomics/Macroeconomics, Tutor (2015-2016)

Awards

Doris Dong Dissertation Award (2023)

Susan Way-Smith Dissertation Award (2022)

Pardee RAND Outstanding Teaching Assistant Award (2022)

Professional Activities

Student Ambassador, Pardee RAND Graduate School (2022-2023, 2023-2024)

Board Clerk, Noble Network of Charter Schools (2018-2020)

Other Information

Citizenship: United States

Technical skills: Stata, Excel, NVivo, Dedoose, Select Survey, familiar with Python, R, SAS, SQL, and Tableau

Data experience: Administrative data, Publicly available data, Survey data, Interview and focus group transcripts, Self-collected experimental data

Quantitative methods: Regression analysis (linear, nonlinear, panel data), Quasi-experimental methods (difference-in-differences, propensity score matching, synthetic controls, instrumental variable, regression discontinuity), Nonparametric techniques (principal component analysis, decision tree, clustering), Experimental research, Survey design, Data visualization

Qualitative methods: Interviews, Focus Groups, Observations, Case study, Document review

Dissertation Abstracts

“The Employment Prospects of Public and Nonprofit Online Universities: Findings from a Correspondence Audit Study” (Job market paper)

Abstract: *Many students pursue online bachelor’s degrees to advance their careers. However, it is uncertain whether online degrees offer the same employment benefits as traditional, in-person degrees, even when they are earned at public and nonprofit universities specializing in online learning. This paper provides the first causal estimates of employer interest in bachelor’s degree graduates from public and nonprofit online universities, including standalone online universities and fully online campuses of traditional universities. Using a correspondence audit field experiment, I submitted 2,164 fictitious applications to real job openings in business, with applicants randomly assigned as graduates from either online or nonselective brick-and-mortar institutions. Given the prevalence of adult learners in online programs, I created resumes and cover letters to resemble recent college graduates in their early thirties with prior work experience. The results show that graduates from online universities are as likely to receive callbacks on their job applications as those from brick-and-mortar institutions. This paper demonstrates that public and nonprofit online universities offer a valuable pathway for adults considering nonselective postsecondary options for their bachelor’s degree.*

“The Labor Market Returns for Online Community College Students”

Abstract: *This paper provides the first evidence on the labor market returns of online degrees and certificates earned at community colleges. Using administrative education and employment data from Ohio’s twenty-three community and technical colleges, I employ a student fixed-effects approach to control for students’ pre-college earnings and academic intentions. The estimates show significant wage increases from associate degrees and long-term certificates, but no benefit from short-term certificates. Returns vary substantially by field of study, with programs in health, computer science, engineering, and business yielding the highest gains. Notably, online and in-person students experience similar returns after controlling for field of study. These results suggest that online community college programs can increase students’ earnings and provide a practical alternative for those who cannot attend in-person classes.*

“Supporting Online Students’ Workforce Transitions: Insights from Career Services in Public and Nonprofit Postsecondary Institutions”

Abstract: *This paper examines how public and nonprofit postsecondary institutions support online students’ transitions into the workforce through career services. Drawing on interviews with twenty career service administrators from two- and four-year institutions with large online student populations, I identify key themes regarding: institutional practices for facilitating successful employment outcomes, challenges in engaging online students, and perceptions of the value of online learning in the labor market. The purpose of this qualitative study is to highlight promising practices and common barriers to delivering effective career services for online students. Data collection is ongoing and expected to conclude in December 2024.*
